WORK EXPERIENCE

TechPixe India

Software Developer

Oct 2025 - Present

- Designed and developed 30+ RESTful APIs using Node.js and Express.js for a multi-vendor e-commerce platform covering vendor onboarding, product catalog, cart, orders, and payment workflows.
- Replaced Mongoose populate-based queries with MongoDB aggregation pipelines, significantly reducing query execution time on data-heavy endpoints.
- Implemented JWT-based authentication with Role-Based Access Control (RBAC) managing permissions across vendor, customer, and admin dashboards.

Corp-Astro

Software Developer

Mar 2025 - Aug 2025

- Architected and delivered a full-stack platform using React.js and Node.js/Express.js, owning end-to-end development from design through deployment on AWS EC2.
- Built 20+ RESTful API endpoints and implemented a real-time WebSocket chat interface using Socket.io handling connection lifecycle and message queuing.
- Configured a Redis caching layer for session management, reducing redundant database queries and improving API response times.

Genamplify Solutions Hub

Software Developer

Mar 2024 - Feb 2025

- Designed and built 30+ RESTful backend services using Node.js and Express.js, architecting endpoint structure, request validation, and error handling middleware for production use.
- Developed a real-time bidirectional communication system using Socket.io for instant messaging, live notifications, and collaborative features with low latency.
- Designed MongoDB schemas with Mongoose ODM, implementing indexing and aggregation pipelines to improve performance on data-heavy booking operations.
